SUMMARY

Python Full Stack Developer and AI/ML student with hands-on experience in Django, Flask, WebRTC, and NLP-based applications. Completed 2 internships and built 9+ real-world projects — all deployed live — including video streaming, real-time communication, OCR, and e-commerce platforms. Seeking a junior developer or full-stack role at a product company or startup.

EXPERIENCE

Pinnacle Labs — AI / Python Intern

Aug 2025 – Aug 2025 · Virtual / Remote

- Developed AI-based applications using Python and NLP concepts.
- Built an auto-correction tool using NLTK to improve text accuracy and grammar.
- Created a real-time multi-language text translation application.
- Worked on text preprocessing, tokenisation, and NLP pipelines.

ApexPlanet Software Pvt Ltd — Web Development Intern

Aug 2025 – Sep 2025 · Virtual / Remote

- Designed responsive web pages using HTML5, CSS3, and JavaScript.
- Built interactive UI components and improved overall user experience.
- Implemented client-side form validation and dynamic page behaviour.

EDUCATION

B.Tech – Computer Science & Engineering (AI/ML Specialisation)

Holy Mary Institute of Technology and Science | Expected 2027

PROJECTS

SmartVision OCR Pro

Flask · OpenCV · Tesseract · EasyOCR · SQLite · Vercel · Render

[GitHub](#)

- Full-stack text detection app with dual OCR engine fusion for higher extraction accuracy.
- Features: NLP auto-correction, voice output, and searchable history dashboard.

NexMeet — Real-Time Video Call App

WebRTC · JavaScript · HTML5 · CSS3

[Live Demo](#)

- Peer-to-peer encrypted video calling with screen sharing and session recording.
- YouTube co-watching feature with synced playback for all room participants.

CineWave — Immersive Video Streaming Platform

JavaScript · HTML5 · CSS3 · Video API

[Live Demo](#)

- Netflix-style streaming UI with gesture controls, comments, and playlist management.
- Features HD playback, episode tracking, and a dynamic content discovery interface.

SmartAuth — Location-Based Intelligent Login

JavaScript · Geolocation API · OTP · HTML5 · CSS3

[Live Demo](#)

- Context-aware authentication using device location with time-based OTP verification.
- UI theme and security level adapt dynamically based on the user's detected location.

Live-Translator — Real-Time AI Translation App

JavaScript · Translation API · HTML5 · CSS3

[Live Demo](#)

- Instant text translation with auto language detection, voice input, and file download.

Smart Text Improver

JavaScript · NLP · HTML5 · CSS3

[Live Demo](#)

- Auto-corrects spelling, improves grammar, and shows readability score with suggestions.
- Supports bulk text correction via file upload with downloadable corrected output.

StreamPlus — Content Streaming App

React.js · JavaScript

[Live Demo](#)

- React-based streaming application with dynamic content rendering and routing.

Easy Shop — E-commerce Web Application

Django · SQLite · HTML/CSS

[GitHub](#)

- Django e-commerce site with user authentication, product listing, cart, and orders.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript

Frontend: HTML5, CSS3, React.js

Backend: Django, Flask, Django REST Framework

Database: MySQL, SQLite, SQL

AI / ML: NLP, NLTK, spaCy, OpenCV, Tesseract, EasyOCR

APIs & Tools: WebRTC, Geolocation API, Translation API, Git, GitHub, Vercel, Render

LANGUAGES

English · Hindi · Telugu
